

Pre-Assembled Kit

If you have limited time or simply want to enjoy your Todd's Sheds structure as soon as possible, consider purchasing our Pre-Assembled Kit. This format is designed for quick, convenient assembly, with most of the components pre-assembled and ready for you to put together on site. **Note:** Not all styles are available in a Pre-Assembled Kit, for example in our large structures such as cabins and garages.

Depending on the size and complexity of your outdoor structure, our Pre-Assembled Kit can generally be assembled by two people in one or two days. **Note:** As products increase in size (cabins, garages) and complexity (dormers, 5 sided roofs, custom options) the time required may vary. Some basic carpentry knowledge would be an asset.

Each Pre-Assembled Kit Contains:

1. Detailed and easy to follow instructions.
2. Pre-Assembled floors (framing only, floor surface installed by customer) walls and trusses.
3. Pre-assembled doors, windows, flower boxes and shutters for added convenience.
4. All required fasteners and hardware such as screws and nails, hinges and handles.

What to know about Pre-Assembled Kits:

1. Some assembly is still required. Pre-Assembled means major structural components such as walls, trusses and the floor are built and framed for you, but it is still necessary to assemble the entire structure. Sheathing, trimming, and shingling are also required.
2. Some of our roof styles require trusses; others require rafters; only trusses are pre assembled. Rafters are pre cut to fit together during assembly.
3. Windows and doors are framed, allowing you to easily install them.
4. Pre-assembled walls can be quite heavy. Depending on the size, you will need two or three people to assist with unloading and installing.
