

## **“Smartside” Panel and Trim: Our Standard Siding**

All of our standard siding panel and trim is manufactured by Louisiana Pacific (LP) a manufacturing company that is dedicated to its customers keeping a green eye on the environment. LP stands behind their Smartside product with a limited 50 year warranty.

This durable structural siding is known as Orientated Strand Board (OSB) which resists warping, cracking and splitting. OSB has a look-a-like wood finish and a decorative vertical groove every 8 inches. The product is a pre-primed low maintenance surface that is ready to finish with any colour of exterior latex paint, with no need for reapplication for many years.

LP uses raw materials very efficiently with small diameter rapidly regenerating trees. With low-emitting safe resins, each product is treated with environmentally friendly borates to resist rot, termites, and mould.
